
SEBASTIAN VILHELM JUHL

seb.vilhelm@gmail.com | +45 30244148 | github.com/vilhelmnielsen

I am a full-stack developer from Copenhagen, currently working at Lunar. I am passionate about accessibility, performance, and user experience, and I like React, systems design, and static type systems. I believe in finding the right tools for the job, and I am not afraid to dive into uncharted waters. I love to learn, and am constantly trying out new tech.

PROFICIENCIES

My main proficiencies include:

- Modern JavaScript & TypeScript development.
- Modern front end frameworks, primarily React.
- Accessibility testing.
- Full-stack development; e.g. with Node.js, and (a little bit of) Ruby and Rails.
- GraphQL; but also REST.
- Javascript bundlers, e.g., Webpack, Rollup, Parcel, @swc, esbuild, and the likes.
- SQL and NoSQL databases, including PostgreSQL, MongoDB, and MySQL.
- Testing; primarily using Jest, react-testing-library, and Cypress.io.
- HTML and CSS, also.

And some of the stuff I'm keen on learning more about:

- Rust.

PROFESSIONAL EXPERIENCE

July 2021 - now: Frontend Engineer, Lunar

Maintaining and developing the internal CRM built with React, TypeScript, GraphQL (Apollo Client) and CSS-in-JS (Styled Components).

March 2019 - June 2021: Software Engineer, Zendesk

Working as a Full Stack developer in the Growth team for the Zendesk product Guide, maintaining the theming integration for Guide Help Centers. Working on a lot of React and Ruby on Rails.

- Maintaining and developing the framework for theming in Guide.
- Building and integrating a marketplace for purchasing and selling themes for Guide.
- Led the push for accessibility improvements and WCAG2 compliance for Zendesk Guide.
- Developing a public REST API for managing Guide themes.
- Writing tests using several frameworks, including Jest, Mocha, AVA, Selenium, Cypress, and RSpec.
- Writing and maintaining GraphQL backends in Ruby and Node.js.
- Maintaining build tooling for several JavaScript projects.

2018: Developer Internship, Ajukreizi Aps

As part of a small team, I assisted in development of web applications using React.js, JavaScript, and Firebase. I redid their website using Next.js and Wordpress, with animations, a focus on accessibility, and multi-language capabilities.

2017-2018: Developer, Frankly A/S

As full-time, and later student developer, I created websites and applications using Wordpress for small and big clients. Furthermore I assisted with any JavaScript development, and maintained projects made with Laravel, CSS, Drupal, and more. I also developed HTML5 ads for Google Adform.

RELEVANT EDUCATION

2017 - 2019: BA Web Development

Copenhagen School of Design and Technology (KEA)

2015 - 2017: AP Graduate in Multimedia Design and Communication

Copenhagen School of Design and Technology (KEA)
