

SEBASTIAN VILHELM JUHL

Senior Software Engineer

(+45) 30 24 41 48 | seb.vilhelm@gmail.com | linkedin.com/in/svnielsen | github.com/sebvilhelm

Senior Software Engineer focused on Go-based event-sourced systems for operations and financial crime prevention. I focus on domain modeling to turn complex real-world processes into business flows.

Work experience

Lunar A/S

Copenhagen

Senior Software Engineer (Squad Surveyor)

April 2024 - Present

- Develop systems for Financial Crime Prevention (FCP) and operations for initial and ongoing due diligence, sanction screening, transaction monitoring, and payment screening.
- Took ownership of core user data domain, including ongoing automatic updates via national registries in Denmark, Norway, and Sweden.
- Drive end-to-end feature development, owning the full lifecycle from system design and business logic to API implementation, automated acceptance testing, and frontend delivery.
- **Core technologies:** Go, PostgreSQL, event sourcing, CQRS, microservices, event-driven architecture

Software Engineer (Squad Voyager)

July 2021 - April 2024

- Primary engineer for a React app used as the key tool for customer support, back office and FCP, using GraphQL to interface with microservice back-ends.
- Maintain infrastructure for stitching many GraphQL servers (microservices) into a single gateway for front-end application.
- Adding features to back-end services in Go and Node.js (TypeScript).
- **Core technologies:** TypeScript, React.js, GraphQL, microservices, JavaScript build tools (Webpack, RSPack, Vite)

Zendesk

Copenhagen

Software Engineer

March 2019 - June 2021

- Part of the team building the integration a marketplace for purchasing and selling themes for Zendesk Help centers.
- Key in implementing accessibility improvements and WCAG2 compliance for the primary theme used by customers, without breaking their custom integrations.
- **Core technologies:** React.js, Ruby on Rails, GraphQL, Redux, HTML, CSS

Ajukreizi Aps

Copenhagen

Intern

August 2018 - October 2018

- Developer internship, working on projects for external clients in React, Next.js, and JavaScript.

Frankly A/S

Copenhagen

Student Developer

June 2017 - March 2018

Intern

January 2017 - June 2017

- Agency work for clients, mostly custom Wordpress solutions with lots of custom PHP, CSS and JavaScript, and also web ads in JavaScript

Education

Copenhagen School of Design and Technology (KEA)

Copenhagen
