Work experience

Lunar A/S	Copenhagen
<i>Senior Software Engineer (Squad Surveyor)</i>	April 2024 - Present
<i>Software Engineer (Squad Voyager)</i>	July 2021 - April 2024
• Primary engineer for a React app used as the key tool for customer support, back office and fcp, using GraphQL to interface with micro service back-ends. • Adding features to back-end services in Go and Node.js (TypeScript).	
Zendesk	Copenhagen
<i>Software Engineer</i>	March 2019 - June 2021
• Part of the team building the integration a marketplace for purchasing and selling themes for Zendesk Help centers. • Key in implementing accessibility improvements and WCAG2 compliance for the primary theme used by customers, without breaking their custom integrations.	
Ajukreizi Aps	Copenhagen
<i>Intern</i>	August 2018 - October 2018
• Developer internship, working on projects for external clients in React, Next.js, and JavaScript.	
Frankly A/S	Copenhagen
<i>Student Developer</i>	June 2017 - March 2018
<i>Intern</i>	January 2017 - June 2017
• Agency work for clients, mostly custom Wordpress solutions with lots of custom PHP, CSS and JavaScript, and also web ads in JavaScript
